The BB5 is an updated model of our BB3 tracker which, in addition to all of the features of the BB3, also brings the additional GSM coverage, which allows for monitoring and tracking anywhere in the world.

Covert battery-powered which offers simple installation in mobile farm machinery and trailers. Its Orion Network-compatibility allows alerts to be managed by the user and with the added GSM functionality it is trackable anywhere in the world.

The weather sealed unit has a four year battery life, which allows for installation away from vehicle wiring looms and power supplies - batteries are replaceable.
