- ▶ By connecting to the Orion Network you can position these sensors anywhere within your network
- ▶ Ease of installation
- ▶ Straightforward to install and are plug and play for easy expansion

One of the most flexible products in the Active Farm Solutions range is our Door or Gate sensor. Due to its weatherproofing and ease of installation this can be used to protect sheds and gates anywhere within your Orion Network, allowing you to cover remote outbuildings or gates very easily.

The battery life in the unit is three to five years and is very easily installed. Through Smarter Technologies' software it allows you to monitor and protect different areas by controlling timed access and notifications.
